FINANCIAL. FIRST MORTGAGE 7 PER CENT. GOLD BONDS,

On a Completed Road, Free of U. S. Tax, At 90 and Accrued Interest in Currency.

Burlington, Cedar Rapids, and Minnesota Railway.

The completion of this Road has given to these Bonds an established character equal to any mortgage issue dealt in at the Stock Exchange.

A contract has been secured with the Chicago, Burlington and Quincy Railroad Company of leasing the latter to invest 50 per cent. of gross earnings derived from traffic with the Burlington, Cedar Rapids, and Minnesota Road in the bonds of this Company.

This arrangement is a strong guarantee of the Bonds, and establishes a large sinking fund for their redemption.

The convertibility privilege in these bonds enables them to be exchanged for stock at par, at any time. This secures to the holder, at his option, a share in any excess of earnings over the interest obligation.

An exchange of Government securities for these bonds returns 9 1/2 per cent. interest, instead of 5 per cent., which is all that Government pays at present price, besides leaving an immediate gain of about 20 per cent. in price for reinvestment.

All marketable securities taken in exchange, free of commission and express charges.

Republican Victory in Indianapolis. The President received a despatch from Senator Morton to-day, stating that Mr. McCauley, Republican, had been elected Mayor of Indianapolis by one thousand majority.

Condition of the Steamer Tennessee. A board appointed by the Secretary of the Navy to examine and report upon the condition of the United States steamer Tennessee on her late trip to San Domingo, have submitted a report, in which they state that the materials of which the Tennessee was constructed were of the very best quality, and say the frame, being of live oak, makes her superior to all other vessels of her class except the Florida, which is identical in construction with the Tennessee.

A thorough examination has proved conclusively that great pains were taken to give the greatest possible strength to every part of the Tennessee. A comparison of her displacement with her internal capacity indicates that as regards safety no more capable vessel of the navy in this respect could have been selected for the service in which she was engaged, and none that would have afforded the same space for comfort without intruding upon the quarters of the officers and crew.

The surface of the principal sails was augmented nearly one-third. This increase has added much to her efficiency under canvas, and given her power to act with safety in all waters. Her equipment in all departments was full and complete for all purposes.

The report goes on to show that the vessel was amply furnished with all the appliances necessary to extinguish fires, having thirty-one delivering nozzles and 1150 feet of hose, and to free the bilges she had six bilge-pumps besides. These were worked by steam.

The board finally determined that the Tennessee evinced no signs of unseaworthiness and proved in all respects as staunch and perfectly safe a vessel for the duty assigned her as ever floated, and that she was also better adapted for this service than any other vessel in the navy. The report is signed by all the members of the board.

Important Business Movement. ST. LOUIS, May 3.—A movement is on foot here among prominent merchants, bankers, and capitalists to organize an association in the interest of cotton and sugar producers, with the design of controlling at least a part of this trade. The movement contemplates a bank in that direct interest with a capital of half a million, large cotton-press, warehouses, and sugar-sheds on the levee, with arrangements for freights which shall give St. Louis an advantage over competing points. One hundred thousand dollars is now ready to embark in this enterprise, and it is said no difficulty will be experienced in speedily raising a million of capital stock. This project has been talked of for some time but it has now assumed definite shape and will undoubtedly be carried out very soon.

LEGAL INTELLIGENCE.

Prison Cases. Court of Quarter Sessions—Judge Finletter. Petty cases were before the Court to-day. James McMillan was tried upon the charge of assault and battery upon his wife, who was said to be afflicted with whisky and bad temper, and on Easter Sunday vented both upon her by striking her and throwing a bowl at her. He said he did nothing of the kind, but that this prosecution was mere spite work, his wife having vowed revenge upon him because he opposed a vexatious lawsuit she had begun. The jury brought in the true version of the affair, and accordingly rendered a verdict of not guilty.

Henry Wilson was convicted of a charge of assault and battery. On Easter Monday evening some little girls were playing upon an open lot, and he seized one of them by the neck and violently threw her to the ground. The prisoner's only excuse was that he had taken too much egg-nog.

James Riecky, colored, was convicted of the charge of stealing a shawl and blanket. Divorce. Baines vs. Baines. This is a suit in divorce, the libellant alleging that he was married in 1865, and his wife deserted him without cause. The wife answered that her husband provided so scantily for her support that she was compelled to leave. Owing to the sickness of a juror the case was continued until to-morrow.
